

CUISHE

Lalo recognizes five distinct sub-species or varietals of agave rhodacantha, known locally as cuishe. This batch utilizes the two which have best adapted to cultivation - "cuishe verde penca larga" and "cuishe verde penca corta." Look for notes of chocolate and citrus.

Once abundant in Santa Catarina Minas, A. rhodacantha populations have dwindled over the past 40 years, replaced by the faster growing and more profitable

Batch: Cuishe 2026-A, 49.85%
